

## Gynaecology: Operative laparoscopy generic pathway v11.0

Referral & surgical review & assessment	Patient selection	Booking/ listing	Pre-op assessment	Admission	Surgery & Post Operative	Discharge & follow-up
---	-------------------	------------------	-------------------	-----------	--------------------------	-----------------------

**Trust Specific Pathway**

**Standardised Pathway**

**DATA collection:**  
• All data capture via EPR

**Overarching Principles**

- Ahead of listing patients for surgery they must be discussed with the owning consultant.
- Robust governance processes must be in place to manage pathology and histology.
- Operating surgeon must write to GP and referring/originating surgeon post procedure as part of the discharge process.
